## FOR IMMEDIATE RELEASE

### Hunt Electric, Inc. Achieves 1,500,000 Hour Safety Milestone

Salt Lake City, Utah (February 18, 2011) – Hunt Electric, Inc., a Salt Lake City-based electrical contractor, has logged 1.5 million man hours without a lost time injury. This milestone compliments the overall Hunt Safety Program that also includes an EMOD rate of 0.65 and approaching one year without a recordable injury.

Nathan Clark, Safety Director at Hunt Electric, cites company-wide safety awareness and a culture that promotes daily commitment to safety by all employees as a major factor contributing to this achievement. “The safety mindset has become a catalyst for all of our daily work activities and even extends to the home-front”, says Mr. Clark. “Hunt Electric employees are required to conduct a daily job hazard analysis (TRACK) before work begins. They have the commitment and resources from management and are empowered to stop any task they feel they cannot do safely or have not been trained to do”, he added.

In congratulating Hunt Electric employees at a company-wide celebration of this safety milestone, Troy Gregory, Hunt Electric President, added that “the team effort in the construction industry to work in a safe environment, including interaction with the general contractor and other subcontractor safety departments, holds us to a high safety standard that affect all trades on a job. Hunt Electric sets the example for job site safety”.

## About Hunt Electric:
